Arizona Sustainability Navigator – One Page Overview

Purpose

The Arizona Sustainability Navigator will serve as a centralized, accessible tool that helps small businesses, nonprofits, and community organizations identify, understand, and act on sustainability opportunities. It simplifies complex information, connects users to trusted partners, and provides clear pathways for both immediate actions and long-term planning. The platform will also include a sustainability event calendar to help users stay informed about trainings, workshops, and key deadlines.

Scope of Content

Hard Sustainability: Energy efficiency, water conservation, waste reduction, transportation, materials, built environment.

Soft Sustainability (New per IEDC): Cross-sector partnerships, entrepreneurial ecosystem support, environmental impacts on community health, workforce development, community engagement.

User Experience (Text-Based Wireframe)
