About Collaboration for Good & The Arizona Sustainability Navigator

Tyler Butler, Founder Collaboration for Good

Collaboration For Good helps organizations uncover their authentic purpose and design values-driven initiatives that align philanthropy with core principles, elevate corporate responsibility, and create meaningful social impact

COLLABORATION for GOOD

Arizona Sustainability Navigator Group

Through the IEDC/Flinn Sustainability Lab with Phoenix and Surprise stakeholders, where the Arizona Sustainability Navigator originated, I was introduced to Local First Arizona's Green Business Boot Camp.

ARIZONA SUSTAINABLE
ECONOMIC DEVELOPMENT LEARNING LAB

We are developing the Arizona Sustainability Navigator, a research-informed resource that will help organizations integrate sustainability into their operations through clear, evidence-based guidance. Though still in development, it reflects our commitment to creating accessible tools that strengthen sustainability and equity across sectors.

ARIZONA Sustainability Navigator

Why is sustainability important for your business?

Include Past Accomplishments

Driving Purpose

- Background in corporate sustainability driving efficiency, resilience, and impact.
- ESG-certified in reporting and disclosure.
- Founded a consulting practice to make sustainability accessible for small businesses and nonprofits.
- Co-led a statewide sustainability survey with Phoenix and Surprise identifying gaps across small businesses, nonprofits, and government.
- These insights shaped the need for a centralized, easy-to-use Navigator.

The Arizona Sustainability Navigator

- A statewide Navigator that gives small businesses, nonprofits, and government clear, accessible sustainability guidance across hard and soft needs.

- What are the measurable impacts?
  - More Organizations Taking Action: Increases the number of businesses and nonprofits completing sustainability steps through clear, guided pathways.
  - Faster Access to Resources: Reduces the time and effort required to find tools, funding, and partners.
  - Broader Statewide Reach: Expands sustainability support to more small, rural, and under-resourced organizations.

- How is the project sustainable?
  - Combines economic, environmental, and social sustainability; supports ongoing practices through assessments, updated resources, and education; strengthens long-term capacity through partner networks.

How Will the Project Be Implemented?

The Navigator cannot be built without outside support.

- **Needs:** UX/UI mock-up, content development, technical scoping, and early-stage platform design.
- **Funding Approach:** Leverage partner support (universities, cities, chambers), student teams, grants, and sustainability-focused funding streams identified through Local First and IEDC networks.

- What is the timeline of your project?
  - **April–December 2026 (draft timeline already created).**
  - **Near-Term Needs:** Connect with UX/UI experts, student teams, and technical partners to build the mock-up.
  - **Data Needs:** Use statewide survey findings; gather additional resource inventories and partner inputs as needed for content accuracy.

Conclusion, Questions, Thank you!, Ect.

- Support the mock-up build by connecting UX/UI talent, student teams, or technical partners.
- Contribute resources (tools, incentives, programs, partner info) to populate the Navigator's content.
- Help secure funding
- Follow and support us on social
